

Pattern Designer & Maker

HELLO!

My Name is **Safiyyah Altaf**.
Currently I am studying in my third year as a MDES Surface Pattern Textile Student at the Swansea College of Art UWTSD. Where I have recently received the **Old Dyvorian's Award 2023**

Designing allows me to share my imaginative creative **identity**. Where motifs and patterns are fused with **colour** and **stories**.

My design process begins through **intuitive research**, finding the **narratives** within the environment around. Seeking hidden memories hiding in the natural world, museums and streets.

The ambitions I have for the future aim to take me into the design industry. Where I can work within an established design company, applying my **skills** and **vision** to an **ethically conscious** standard.

Surface Pattern designer and maker to me, means working across many techniques. Allowing for conceptual narratives to be explored in an intuitive way.
